Non-Traditional (24 or older)	1%	46%	0%	13%	6%	37%	6%	31%
Traditional (less than 24)	99%	54%	100%	87%	94%	63%	94%	69%

National Survey of Student Engagement

[a] Response rate (number of respondents divided by sample size) is adjusted for non-deliverable mailing addresses.

[b] Oversampled students are included in institution numbers but not in consortium, Carnegie, or NSSE 2004 sample numbers.

[c] Sampling error is an estimate of the margin by which the 'true' score for your institution on a given item could differ from the reported score. To interpret the sampling error, assume that 60% of your students reply "very often" to a particular item. If the sampling error is +/-5%, then the true population value is most likely between 55% and 65%.

[d] Each number represents the percent of total respondents within the category.
